EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in telephone interviews with Timothy Levstick on November 30 and December 1, 2005, and February 2, 2006.

IN THE SPECIFICATION

At page 1, first sentence insert after "July 12, 2001" the phrase –now abandoned–.

–.

At page 5, line 22, delete "face" and insert therefore –base--.

The above amendment was made to correct an inadvertent translation error present in the priority document.

IN THE CLAIMS

32. A method for making a self-adhesive labelstock, the method comprising: contacting wet paper made with pulp comprising chemical pulp with a smooth, hot surface for a time and temperature which is effective for providing an outer surface of the face paper with a finished surface for printing, the face paper also having an inner surface opposite the outer surface;

[applying an adhesive to the inner surface of the face paper;]

coating a releasable base layer with a release coating to provide a release coated base layer [paper];

applying an adhesive to the release coating on the release coated base layer;

and

laminating the [release] adhesive coated side of the base layer to the inner surface of the face paper [adhesive layer].

In claims 33, 34 and 35, line 1 of each, delete "shelf" and insert therefore --self--.

2. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 32-35, drawn to a method of making a self-adhesive labelstock, classified in class 427, subclass 207.1.
 - II. Claims 18-31, drawn to a self-adhesive labelstock and method of making an adhesive coated face paper, classified in class 428, subclass 343.
3. The inventions are distinct, each from the other because:
4. Inventions Group I and Group II are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions differ in both the process and method of making by the presence of a release layer that is coated on a release liner, i.e. base paper, thus adding both a significant structural entity and accompanying additional process step, and as such are clearly different for purposes of patentability.
5. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

6. During telephone conversations with Timothy Levstik on November 30 and December 1, 2005, and February 2, 2006 a provisional election was made without traverse to prosecute the invention of Group I, claims 32-35. Affirmation of this election must be made by applicant in replying to this Office action. Claims 18-31 are withdrawn from further consideration by the examiner, 37 CFR 1.142(b), as being drawn to a non-elected invention.

7. Cancel claims 18-31.

8. The following is an examiner's statement of reasons for allowance: The amendments to claim 32 find clear support in the specification at page 5, line 21 – page 6, line 2, while the amendments to claims 33-35 correct an obvious informality. Additionally, the Restriction Requirement is believed proper since the nonelected claims 25-31 all involve only two layered elements instead of the significantly more complex structures set forth in the allowed claims which are definitely not believed to be either disclosed or rendered obvious by any of the prior art of record or possible admissions made in the specification. Finally, as to claims 18-24 these are believed best handled in a Continuation application since they are believed to involve additional issues of patentability such as might be raised by prior art such as that set forth on the accompanying PTO Form 892.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Daniel Zirker whose telephone number is 571-272-1486. The examiner can normally be reached on 5-4-8:30-6:00.
